

18. A media file distribution system as claimed in claim 1, wherein said media file distribution server system comprises an encryption key data base, wherein said encryption key data base stores encryption keys related to each said encrypted media data file, and wherein upon transmission of said encrypted data media file to said user, a matching de-encryption key is provided to said user.

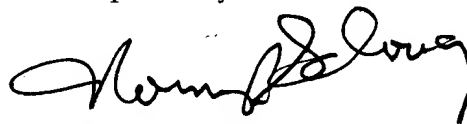

19. A media file distribution system as claimed in claim 18, wherein said de-encryption key is adapted to interrupt access of said media data file by said user and automatically initiate a communication with said server system for validation of said de-encryption key.--

#### REMARKS

The claims have been revised to further scope the invention. No new matter is believed entered by any of the foregoing amendments.

The filing fees have been calculated based on the claims as amended. In the event there are any fee deficiencies or additional fees are payable, please charge them (or credit any overpayment) to our Deposit Account No. 08-1391.

Respectfully submitted,

Norman P. Soloway  
Attorney for Applicant
